

# Adrian Alexandru Coman

Android Developer

Android Developer and software enthusiast. Like to mess with things technology related and discover how to mix and match different software components to better help me in development. Worked on a multitude of software applications, ran through all the phases of software development cycle and I survived to tell the story.

## Info

Date of birth: 15 june 1989  
Place of birth: Bucharest, Romania  
Citizen status: Not married

## Education

**Romanian - American University**  
Computer Science  
2011 - 2014

## Work History

2015

Android Developer

Hypersense Software Solutions

June 2015 - Present

As an outsourcing company we developed a large range of applications. Was part of a small team (2 android, 2 ios) that worked on different kinds of software apps ranging from simple REST inclined product presentation apps to chat applications with geofencing capabilities.

During the time at Hypersense, had to fill in for other positions as well: node.js for backend work on the aforementioned chat app, Windows Phone & Blackberry developer for the same app.

2014

Project Manager & Android Developer

BMBC Premium Solutions

September 2014 - June 2015

Started to work on a CRM & ERP modular solutions that would tailor to a large range of products and services: fleet management, workforce management, food ordering services etc.

Started project on my own while developing the backend (php & node.js) and android application. Later got three more people involved: two frontend developers and one backend (php) developer. Ended work on the project after launch date.

2014

Android Developer

RCS&RDS (Digionline app)

June 2014 - January 2015

Worked on the android app that would let users watch content that was broadcasted on TV or watch video on demand content (movies and tv shows), listen to online radio stations, check the RCS&RDS news reader or look up on the TV program.

2012

Windows Phone Developer

Microsoft Student Partner

October 2012 - June 2014

Created apps for the emerging market of Windows Phone. Had to develop independent apps and worked on small apps for Microsoft partners (book readers, small games, weather app etc).

Taught other students how to develop apps and write XAML & C# code

2014

Solo jobs

Stii sa scrii - Android App

In 2014 created my 1st android app with the mindset of learning the system. It was a simple quiz type game around romanian most mistyped words. The app got to number 7 most downloaded apps in Romania and got to 200.000 downloads. Currently working on a version 2 for the app that should be launched at the beginning of June for both iOS and Android.

2016

Project Manager and Backend Developer

At the beginning of 2016 started to work on the idea behind a dating app pretty similar to Tinder. As the client only wanted an iOS version of the app for phase 1, i decided to help out with coding on the backend while supervising the development process on iOS.
